DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: on page 116, line 2, "compounds" is misspelled.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over each of Yoshino (2003/0190546) and Takano (5,427,879). Yoshino (paragraphs 290-300) and Takano (claims) each teach electrophotographic photoreceptors where two or more similar charge transfer materials are used in the photosensitive layer. It would have been obvious to one of ordinary skill in the art to use any desired similar charge transfer materials because of the direct suggestions of each of Yoshino and Takano.
